Summary

Aspiring Software Developer with strong knowledge in Java, Spring Boot, HTML, CSS, JavaScript, and MySQL. Experienced in developing full-stack web applications with secure authentication and database integration. Passionate about building scalable applications and continuously improving technical skills to contribute effectively in a professional software development environment.

Skills

Programming Languages: Java, JavaScript
Frontend Development: HTML, CSS, Responsive Web Design
Backend Development: Spring Boot, REST API Development
Database: MySQL, SQL
Tools: GitHub, VS Code, IntelliJ, Postman, Maven

Projects

Online Job Portal System

January 2026 - March 2026

- **Technologies Used:** Java, Spring Boot, MySQL, HTML, CSS, JavaScript
- Developed a full-stack web application enabling user, recruiter, and admin authentication with role-based access control.
- Designed and implemented RESTful APIs for job posting, job application, and resume management.
- Integrated MySQL database for secure storage of user profiles, job listings, and application records.
- Implemented CRUD operations following MVC architecture and Object-Oriented Programming principles.
- Ensured data validation and backend security for reliable and efficient system performance.

Certifications

- Java Programming Certification – Win Tech
- JavaScript Certification – GeeksforGeeks
- MySQL Certification – Cognitive Class

Education

Bachelor of Science (B.Sc) in Computer Science

Graduation Year: 2026

M.D.T Hindu College, Tirunelveli
